Professional Summary

Passionate C# and ASP.NET Developer with strong problem-solving skills and hands-on experience in building desktop and web applications. Skilled in C#, ASP.NET Core, WinForms, WPF, MVC, Web API, SQL Server, and API development. Experienced in creating responsive dashboards, management systems, and user-friendly software solutions. A quick learner who is actively improving development skills and building real-world projects on GitHub.

Technical Skills

Languages:

C#, ASP.Net, SQL, HTML, CSS

Frameworks & Technologies:

ASP.NET Core, .NET Framework, WinForms, Entity Framework Core, LINQ, REST APIs

Frontend & UI:

Windows Forms (WinForms), Responsive UI Design, Dashboard Development

Backend Development:

ASP.NET MVC, Web API Development, MVC, WPF, Authentication & Authorization, CRUD Operations

Databases:

SQL Server, MySQL, Database Design, Stored Procedures

Tools & Platforms:

Visual Studio, VS Code, Git, GitHub, Postman

Software Development:

Object-Oriented Programming (OOP), Debugging, Problem Solving, Application Deployment

Experience

Tech Solutions Hub

Junior .NET Developer

- Assisted in developing and maintaining ASP.NET and WinForms applications
- Worked with SQL Server databases including CRUD operations and query optimization
- Developed user-friendly interfaces and dashboards for business applications

Self Employed

- Collaborated on API integration and backend functionality improvements 2023 – Present
- Debugged and tested applications to ensure smooth performance and reliability Remote

Projects

Collaborative Software Development

(Remote)

Worked with Senior Software Developers

2025-2026 – Present

– Temperature Monitoring System

Worked collaboratively with senior software developers on a real-time temperature monitoring system for tracking and managing environmental conditions with automated alerts and data visualization.

– Alpha Bank Client Project

Contributed remotely with senior software developers on multiple client-based software solutions involving dashboard development, database management, UI improvements, and application maintenance.

Freelance C# & ASP.Net Developer

2023 – Present

Self-Employed | Remote

– Housing Society Management System

Developed a complete management system using C#, ASP.NET, and SQL Server to manage residents, plots, billing, complaints, and administrative operations with an organized dashboard interface.

– Sales Management System

Built a desktop/web-based sales management application for handling product inventory, customer records, invoices, and sales reporting with automated calculations and database integration.

– Smart Donation & Food Redistribution System

Designed a smart platform to connect donors with needy people and organizations for efficient food redistribution, reducing food waste through a centralized management system.

Education & Certifications

Government College University, Faisalabad

Oct 2022 – Aug 2026 (Expected)

Bachelor of Science in Information Technology

Faisalabad, Pakistan

- ASP.NET & C# for Web Development – Online Certification
- Hands-on Training in Building Web Applications using ASP.NET Core, and REST APIs
